

# KALLA NITHIN

Fresher Software Developer | Python | Java | MEAN STACK

nithinkalla2004@gmail.com • +91 7893893697 • [linkedin.com/in/nithinkalla](https://www.linkedin.com/in/nithinkalla)  
[github.com/Nithinkalla](https://github.com/Nithinkalla)

---

## Summary

Enthusiastic developer with strong basics in programming and hands-on experience through personal projects in Python, Java, and Machine Learning. Quick learner, team player, and eager to grow by solving real-world problems.

---

## Projects

### Virtual Try On System - Link

Feb 2025 - May 2025

- A deep learning-based 3D virtual try-on system that uses RGB-D input and DensePose to understand human body structure. It aligns clothing textures and 3D geometry to produce realistic try-on outputs using advanced computer vision techniques.

### Art Style Classification - Link

July 2024 - Jan 2025

- An image classification model that uses deep learning and CNNs to identify and classify artworks into distinct art styles. Data augmentation and computer vision techniques improve accuracy across diverse painting styles.

### File Transfer Application - Link

May 2025 - June 2025

- A cross-platform mobile app built using Java and Android SDK for fast and secure file sharing between devices. It supports real-time wireless file transfer using hotspot/Wi-Fi Direct, ensuring efficient data transmission without internet dependency.

---

## Skills

### Hard Skills

- Programming languages : Java, Python, JavaScript, DSA
- Database : MySQL
- Developer Tools : GitHub, VS Code
- Area Of Interest : Machine Learning, Python, Java

### Soft Skills

- Team Collaboration
- Adaptability
- Effective Time Management

---

## Education

### Bachelor's of Technology in Computer Science and Engineering.

Sep 2021 - July 2025

- Malla Reddy University.
- CGPA - 8.68/ 10.

---

## Certificates

- NPTEL: Programming in Java, Data Analytics with Python, Deep Learning
- Bharath Intern: Web Development
- HackerRank: Java (Basic), Python (Basic)
- Cambridge English: B2 Level

---

## Achievements

- Web Hackathon: Secured 2nd place in a two-day event, showcasing strong problem-solving and web development skills.
- Workshops: Attended sessions on Generative AI and MERN Stack, gaining hands-on exposure to advanced technologies.

---
